

## Universal Design Certified Professional (UDCP)

NARI Universal Design Certified Professionals (UDCP) are recognized as experienced remodelers, skilled in all aspects of universal design and remodeling.

The UDCP Program addresses the key concepts of Universal Design as applied to residential remodeling:

- \* Conducting client needs assessments
- \* Universal design applications used in residential remodeling
- \* Construction techniques used to implement universal design to a remodeling project
- \* Plumbing and electrical systems unique to universal design
- \* Differences between model building codes and one described in the Americans with Disabilities Act (ADA)

With increased national life expectancy, the demand for universal design projects has steadily grown. This rise in demand offers remodeling contractors an excellent opportunity to be diversified and grow their business. Clients demand specific expertise in this area.
